

# CPSC 482 Capstone Senior Design (Computer Science)

## Final Paper Evaluation Rubric

### Professor Andruid Kerne

Design Process and Research Products	0	1	2
Is the problem clearly stated? Are motivating needs & requirements articulated?			
Is the project appropriately situated amidst significant prior work?			
Is the system-level functional description well thought-out and sound?			
Is each component well-designed?			
Was feedback elicited and data gathered?			
Was the data analyzed to advance formative and summative understanding?			
Was the analysis fed back to iterate the design?			
Is the experience compelling?			
Are hypotheses clearly stated?			
Are hypotheses clearly validated?			
Is the work original?			
Are generalized implications for design articulated?			
Are the seeds of a meaningful research contribution developed?			

Paper	0	1	2
Is the paper well-written?			
Is the paper logically organized, with a clear progression?			
Are important terms clearly introduced and defined, and then used consistently?			
Is the paper written in one consistent voice?			
Are there clear and compelling figures?			
Are there clear captions for the figures?			
Are the figures contextualized in the text?			
Is there a balance between high-level conceptual material and technical detail?
